News letter

Acert Construction was founded in 1985 as a home-based firm specializing in 3D civil structural CAD designer. We have since grown into one of the most reputable engineering construction firms in TX. Today, Acert contractors are a multidisciplinary firm with in-house capabilities to complete general civil, structural FEM, transportation, aviation and water resources engineering; land survey; and construction management projects for federal, state and local government agencies as well as private sectors.

Although our staff has grown to include a number of excellent project managers, Acert's principals continue to play key roles as both project and quality control managers assuring that our clients receive optimal products. We have earned the confidence of our clients over the years due to our employees' passion, integrity, and responsiveness. Our goal is to solve your program and project challenges with our unmatched level of enthusiasm and commitment to high-quality service within the required budgetary and schedule requirements.
